Concrete and Subfloor Prep Products

Patching

CustomTech® patching products offer durable floor covering support. Patch over concrete, plywood, existing tile and other surfaces for even, **quick-setting results from feather edge to 2"**. These patching products help to eliminate bond failure, crumbling and mildew in the substrate, which will increase the durability and longevity of the installation.

PRODUCT	ITEM CODE	SIZE	PACKAGE
Silk	SILK10T	10 lb. (4.5 kg)	Bag
TechPatch MP	TPMP25T	25 lb. (11.34 kg)	Bag
TechPatch RP	TPRP40T	40 lb. (18.14 kg)	Bag

Moisture Control

Uncontrolled moisture can cause damage to floor coverings such as blistering and discoloration. It can also weaken bonds to flooring adhesives or cause cracks or crumbling. Protect the integrity of the installation by controlling the rate of moisture vapor transmission with CustomTech's moisture control solution. **Moisture transmission rates are reduced** to less than three pounds, and the substrate can be primer-ready in as few as five hours.

Primers

CustomTech® primers help create a strong bond over both **porous and non-porous surfaces**. Applying an appropriate primer improves the bond of the leveling system, creating a more uniform and durable installation. CustomTech presents a variety of different primer options to meet the needs of most any project.

Levelers

CustomTech offers superior self-leveling underlayments that add strength, durability and an even surface for the application of floor coverings. They seek their own level in minutes and set quickly, adding extra support and high compressive strength to residential and commercial installations. Our top performing self-leveling underlayments feature our **Low Prep Technology** — No mechanical prep required for suitable substrates.
